Empowering Professional Development for Educators

Overview

Math educators are facing increasing demands—student learning gaps, instructional pacing pressures, and rising teacher burnout. This session provides practical, research-informed engagement strategies that help teachers build sustainable instructional systems that improve student participation while reducing daily workload strain.

Teacher PD

Participants will leave with strategies to:

- Build sustainable engagement routines in math instruction
- Reduce repetitive reteaching through structured learning systems
- Increase student participation and accountability
- Streamline instructional planning and delivery
- Strengthen classroom management through engagement design
- Support teacher wellness through workload-reducing practices

Program Outcomes/ Dates

- Improved math classroom engagement practices
- Reduced teacher burnout related to instructional workload
- Stronger alignment between instruction and student participation
- Practical systems teachers can implement immediately
- Increased instructional consistency across classrooms

Who This Is For/ Session Format

- Middle and high school math teachers
- Instructional coaches and math coordinators
- Curriculum and instruction leaders
- 60–90 minute workshop (overview session)
- Half-day professional development session
- Full-day intensive training with application activities
